

Seaology 101

Since recorded history, people have flocked to the sea to take advantage of its healing properties. The Seaology™ team has captured these benefits in its products and treatments, which are based on the remarkable health and beauty benefits of “Laminaria Digitata,” an Atlantic Ocean, cold water, brown seaweed, which has the highest iodine content of all seaweeds, with the most powerful antioxidants for maximum results to the skin.

Seaology™ Plant•Air•Marine has been created with the most vital and active marine properties that are free from chemicals and artificial/synthetic materials, and always cruelty free. Using only natural aquatic and pure plant extract ingredients for the ultimate experience in body care.

This comprehensive line refines the silhouette and increases the elimination of toxins in the skin, for a smoother, healthier glow. Naturally!

Create The Spa Experience at Home!

In today's stress-filled world, a visit to a spa can provide much-needed rejuvenation for body and soul. While there is no substitute for being pampered by someone else's hands, you need not spend a small fortune to experience the benefits of a day or two at the spa. In fact, you can create a near-professional spa experience in your own home. All you need is the desire and Seaology™.

Inspired by the finest Spas in the world! To allow mind and body to drift to a place of healing and peace. Seaology™ products use vitamin enriched plant extracts to replenish and nourish, along with therapeutic marine extracts, like Laminaria Digitata to purify and improve circulation, and inviting aromatherapy for the ultimate spa experience AT HOME!

Sea Bags Bath Soak Revitalize

A rejuvenating blend of Eucalyptus, Rosemary, Green Tea and Laminaria Sea Kelp to bring you back to life!
